

π

In the land of the rising sun two mysteries found each other. Tra the princess of Huong Duong, the empire of the eternal Lotusflower and the time travelling electric eclecticist Gene Berlin.

The treasure of their adventures are collected noises, which they rhythmize in their melodies in an experimental way, presented to a selected audience on their timetravels. The End of Pi celebrate their sound in orgiastic ceremonies and

roaming the realm of downbeat to dubstep. Berlin, the home of electronic music is therefore their base to conquer the musical universe.
